Let's Make the World more **Beautiful**

About us

AGRO CS was established in 1992 as a follower of the former company Agropodnik. The company continued business activities of Agropodnik and started to produce substrates and fertilizers and sell goods for gardeners.

In the following years daughter companies in Slovakia, Poland, Ukraine, Hungary and Romania were established.

In 2009 and 2011 two subsidiary companies in Lithuania were established. These companies are engaged in mining black and white peat, which is a basic ingredient of substrates produced by AGRO CS.

In 2013 and 2015 AGRO CS became a majority owner of two agricultural companies oriented to plant and meat production. Since 2018, AGRO CS has had a 100% share in it. In 2015, AGRO CS became the owner of the peat bog and a manufacturing plant in Belarus. In 2018 AGRO CS became 100% shareholder in Jeseničan s.r.o., focused on pet food production.

Within the years the company grew up and it was necessary to increase the production and storage capacity. In 2007 a new production and logistics centre was built. Its total warehouse capacity is about 115 000 m² of a solid surface and 60 000 m³ of covered premises.

Nowadays AGRO CS consists of 5 divisions - Garden, Agricultural Service, Mechanical Engineering, Bioenergy and Pet Food. All of them are well known among its customers as a reliable and responsible supplier of products, services and modern technologies for gardening and high-quality food for pets.

Garden Division supplies all **the gardening products** (substrates, fertilizers, lawn programme, plant protection products and others) to customers. The company puts emphasis on the quality of the products and provided services. All the products can be found in **specialized garden centers, common retail sale and wholesale networks**.

Garden Division also focuses **on professional growers, golf courses and football pitches operators, implementation companies, cities and municipalities**. Since 2004 we have been running 35 hectare turf nursery, where we grow turf of the highest quality.

Mechanical Engineering Division has a long-standing tradition and excellent experience in development, planning, construction, production and delivering **technology for handling loose materials, weighting and packaging goods and for the waste management sphere**.

All the supplied technologies are often used in environment containing aggressive chemicals (chemical production, storage of industrial fertilizers, etc.). These technologies and control systems are widely known in the Czech Republic, as well as in Lithuania, Hungary, Germany, Poland, Austria, Russia, Slovakia and Ukraine.

Agricultural Service Division provides farmers and distributors in the Czech Republic with **industrial fertilizers and comprehensive services**. The division is also oriented to **customized mixing of fertilizers, transportation of the DAM liquid fertilizer and land mapping** using the GPS system. The division also provides **accredited analysis** of soil, water, waste water, sediments, fruit, vegetables and many others in its own modernly equipped and certified laboratory.

Bioenergy Division currently operates **biogas plant** with an output of 1.7 MW and the subsequent composting plant. Both devices process raw materials of plant origin. **The outcome is both electricity and heat** supplied to the heating system of cities. The composting plant produces **a compost certified for agricultural use**.

Since 2018 AGRO CS a.s. has been the owner of **Jeseničan s.r.o. company** that produces **GRAND pet food**. It is pet food without substitutes, artificial preservatives and flavorings, using **monoprotein recipes** (proteins always come from one type of fresh meat) and containing **98-100% meat**. This activity is managed by **PETFOOD division**.

*Use plant protection products safely. Always read the label and product information before use.
Pictures of products are of an illustrative character. Mistakes and changes reserved.*

AGRO brand has the widest assortment of products for cultivation on the Czech market, which has been being created since the end of the last century. AGRO substrates and fertilizers can be found in **almost every garden center, hobby chain and even a small flower shop**. In addition to special **substrates and fertilizers**, this brand also sells **the plant protection products, grass-seed mixtures and decorative materials**. All products, by their structure and composition, meet the requirements of specific plants.

AGRO | SUBSTRATES

Gardening Substrate

- Containing **Vitality Complex** – for vitality of your plants
- Contains a dose of **Kristalon** fertilizer acting for 6 weeks
- Having active humus (the most fertile type of soil)
- For planting in gardens (decorative and fruit bushes and trees)
- For mobile green vegetation in pots
- For growing flowers and vegetables both in garden beds and in greenhouses

COMPOSITION: Peat, high-quality matured bark humus, adjusted pH

EXPIRY DATE: 3 years from the production date

PACKAGE	PRODUCT NUMBER	PIECES PER SHRINK-WRAP	PIECES PER PALETTE	EAN

Substrate for Pelargoniums and other Balcony Flowers

- Containing **Vitality Complex** – for vitality of your plants
- Contains a dose of **Kristalon** fertilizer acting for 6 weeks
- Developed for the needs of balcony flowers requiring a high dose of nutrients to grow well (pelargoniums, petunias, lanais, lobelias, begonias, fuchsias, bidens – black-jacks, etc.)
- Also suitable for self-irrigating flower boxes

COMPOSITION: Peat, high-quality matured bark humus, clay, adjusted pH, high nutrient and microelement content

EXPIRY DATE: 3 years from the production date

Substrate for Indoor Plants

- Containing **Vitality Complex** – for vitality of your plants
- Contains a dose of **Kristalon** fertilizer acting for 6 weeks
- For growing both flowering and non-flowering indoor plants (e.g. cyclamens, mini roses, sinningias, African violets, scheffleras, sansevierias – mother-in-law's tongue, zebrinas – inch plants, etc.)

COMPOSITION: High-quality peats with a high proportion of fibrous species, fine bark humus, equilibrated nutrient-element and trace-element content

EXPIRY DATE: 3 years from the production date

Substrate for Strawberries

- Suitable for strawberries and other small fruits
- It can be used for growing in garden beds and in plant pots and boxes
- Contains a dose of **Kristalon** fertilizer acting for 6 weeks
- With a high humus content
- Not suitable for acid-loving plants (e.g. blueberries)

COMPOSITION: Peat, high-quality matured bark humus, basic nutrients and trace elements, KRISTALON fertilizer

EXPIRY DATE: 3 years from the production date

PACKAGE	PRODUCT NUMBER	PIECES PER SHRINK-WRAP	PIECES PER PALETTE	EAN
45l	00121A	-	51	8594005006362

Substrate for Tomatoes, Peppers and Cucumbers

- Contains calcium, which acts as a **prevention against tomatoes belly buttons turning black and against putrid endings of peppers and squashes**
- Suitable for growing tomatoes, peppers and cucumbers both in pots and flower beds

COMPOSITION: Peat, compost, high-quality matured bark humus, dolomitic limestone, basic nutrients and trace elements

EXPIRY DATE: 3 years from the production date

PACKAGE	PRODUCT NUMBER	PIECES PER SHRINK-WRAP	PIECES PER PALETTE	EAN
45l	00124A	-	51	8594005009721

Substrate for Blueberries and Cranberries

- Contains fertilizer acting for 6 weeks
- **Nitrogen from keratin is released progressively in the soil, having a long-term effect**
- For growing blueberries, cranberries, bilberries and other acid-loving plants (e.g. azaleas, rhododendrons, heathers, etc.)

COMPOSITION: Peat, high-quality matured bark humus, keratin, low pH value, basic nutrients and trace elements

EXPIRY DATE: 3 years from the production date

AGRO | SUBSTRATES

Peat

- For universal use in farming, forestry (when planting tree nurseries) and gardening
- Suitable for **preparing cultivation substrates**
- It can also be used for acid-loving plants

COMPOSITION: High-quality natural organic matter without admixtures, prepared just by separation to have a medium grain size

EXPIRY DATE: 3 years from the production date

PACKAGE	PRODUCT NUMBER	PIECES PER SHRINK-WRAP	PIECES PER PALETTE	EAN
10 l	00023A	-	210	8594005003095
20 l	00024A	-	120	8594005003118

Substrate for Seeding and Propagation

- Containing **a root-taking activator** that is ideal for healthy growth of young plants
- Containing **a special fine structure**
- For germination of seeds, for replanting young plants
- For cuttings becoming deeply rooted
- For pre-growing the planting stock of flowers and vegetables
- For vegetative propagation of plants

COMPOSITION: Peat, sand, modified reaction, fine structure, low nutrient content for even germination of seeds and cuttings becoming deeply rooted

EXPIRY DATE: 3 years from the production date

PACKAGE	PRODUCT NUMBER	PIECES PER SHRINK-WRAP	PIECES PER PALETTE	EAN

AGRO | SUBSTRATES

Substrate for Roses

- Higher nutrient content
- Guaranteeing healthy growing roses
- **Rich flowering start**, influencing the size and fullness of flowers

COMPOSITION: Mixture of selected species of peat, high-quality matured bark humus, adjusted pH

EXPIRY DATE: 3 years from the production date

PACKAGE	PRODUCT NUMBER	PIECES PER SHRINK-WRAP	PIECES PER PALETTE	EAN
50 l	00141A	-	51	8594005007345

Lawn Substrate

- For improving the quality of soil before establishing your lawn
- For recovering your lawn during its vegetation
- Excellent for **additional regeneration seeding in damaged areas**

COMPOSITION: Fine-sieved peat, high-quality compost, special silica sand

EXPIRY DATE: 3 years from the production date

PACKAGE	PRODUCT NUMBER	PIECES PER SHRINK-WRAP	PIECES PER PALETTE	EAN
50 l	00750A	-	51	8594014350388

Substrate for Decorative Woody Plants

- Containing **Vitality Complex** — for vitality of your plants
- Contains a dose of **Kristalon** fertilizer acting for 6 weeks
- Adjusted pH value
- **For planting decorative woody plants** — coniferous and broadleaved trees and bushes (e.g. spruces, pine trees, yew trees, junipers, thuyas, cypress trees, decorative maples, etc.)

COMPOSITION: Peat, matured bark humus, low pH value, basic nutrients and trace elements

EXPIRY DATE: 3 years from the production date

PACKAGE	PRODUCT NUMBER	PIECES PER SHRINK-WRAP	PIECES PER PALETTE	EAN
20 l	00137A	-	120	8594005007420
50 l	00139A	-	51	8594005007413

Substrate for Rhododendrons and Azaleas

- Lower nutrient content
- Low pH value
- **For growing all acid-loving plants** – rhododendrons, azaleas, Canadian blueberries, heathers, etc.

COMPOSITION: Peat, matured bark humus, low pH value, basic nutrients and trace elements

EXPIRY DATE: 3 years from the production date

50 l	00135A	-	51	8594005003514

Substrate for Lavenders and Oleanders

- Contains **fertilizer for the first 6 weeks**
- For richer flower and fruit production
- For lavenders, oleanders and other Mediterranean plants, such as olive trees, citruses, etc.

COMPOSITION: selected types of peat, high-quality fine matured bark humus and sand, modified pH, essential nutrients and trace elements

EXPIRY DATE: 3 years from the production date

PACKAGE	PRODUCT NUMBER	PIECES PER SHRINK-WRAP	PIECES PER PALLETTE	EAN
20 l	00191A	-	120	8592542013577

Substrate for Palms and Green Plants

- For replanting indoor leaf-ornamental plants (palms, ficuses, philodendrons, monstera, spider plants, peperomias, inch plants, yuccas, dracaenas, asparagus, etc.)
- Containing active humus and fertilizer for 6 weeks of growing

COMPOSITION: Selected species of peat, high-quality matured and fine bark humus, modified reaction, nutrients and trace elements

EXPIRY DATE: 3 years from the production date

PACKAGE	PRODUCT NUMBER	PIECES PER SHRINK-WRAP	PIECES PER PALETTE	EAN
20 l	00114A	-	120	8594005007130

Substrate Peat-Free Growing

- With compost and wood fiber
- Contains fertilizer, limestone for pH modification
- Aerated and well permeable
- For growing flowers and vegetables plants

COMPOSITION: High-quality humus, adequate nutrient content, modified reaction

EXPIRY DATE: 3 years from the production date

PACKAGE	PRODUCT NUMBER	PIECES PER SHRINK-WRAP	PIECES PER PALETTE	EAN
40 l	00104A	-	51	8592542013225

Substrate for Citruses

- Containing **Vitality Complex** – for vitality of your plants
- Contains a dose of **Kristalon** fertilizer acting for 6 weeks
- Containing the admixture of iron in a chelate binding – preventing from the occurrence of chlorosis leaf yellowing
- Providing healthy growth and rich flowering and fruit-growing of citruses

COMPOSITION: Selected species of peat, high-quality fine matured bark humus and sand, adjusted pH, basic nutrients and trace elements

EXPIRY DATE: 3 years from the production date

PACKAGE	PRODUCT NUMBER	PIECES PER SHRINK-WRAP	PIECES PER PALETTE	EAN
10l	00131A	-	210	8594005007376

Substrate for Cactuses and Succulents

- With a higher proportion of porous material – **significantly reducing the risk of decaying roots**
- For growing the majority of xerophytic plants like cactuses and succulents (cactus, aloe, prickly pear, Euphorbia milii, etc.)

COMPOSITION: Selected species of peat, silica sand, expanded clayish granulated pieces, equilibrated proportion of nutrients and trace elements

EXPIRY DATE: 3 years from the production date

PACKAGE	PRODUCT NUMBER	PIECES PER SHRINK-WRAP	PIECES PER PALETTE	EAN
5l	00103A	-	250	8594005007178

Substrate for Bonsai

- Contains trace elements
- **For growing all types of bonsai** (coniferous and deciduous, indoor and outdoor)

COMPOSITION: peat, clay particles, sand and crushed expanded clay, enriched with essential nutrients

EXPIRY DATE: 3 years from the production date

PACKAGE	PRODUCT NUMBER	PIECES PER SHRINK-WRAP	PIECES PER PALETTE	EAN
2l	00138A	-	300	8594005007642

AGRO | MINERAL FERTILIZERS

Fertilizer for Fruit Trees and Small Fruits

- Chloride-free fertilizer
- Equilibrated nutrient content
- With a higher magnesium content – **supporting equilibrated growth and higher (regular) fecundity**
- For fertilizing fruit trees and small fruits (currants, gooseberries, raspberries, etc.)
- **Dosage:** 5 kg of the fertilizer is sufficient for up to 60 m² according to a plant's variety and its fecundity period

COMPOSITION: Granulated combined fertilizer;
nitrogen – phosphorus – potassium (9-6-6) + 6% of magnesium

EXPIRY DATE: 10 years from the production date

PACKAGE	PRODUCT NUMBER	PIECES PER SHRINK-WRAP	PIECES PER PALETTE	EAN
5 kg	000374	-	156	8594005001879

Fertilizer for Potatoes

- Ensures a richer harvest
- Reduces potato rot and improves storability
- Enriched with magnesium – for higher starch content
- For primary fertilization of potatoes before spring planting
- **Dosage:** 5 kg of fertilizer covers up to 60 m²

COMPOSITION: Granulated compound fertilizer,
N-P-K (12-6-20) + 3% magnesium (MgO) + 8% sulfur (S)

EXPIRY DATE: 10 years from the production date

PACKAGE	PRODUCT NUMBER	PIECES PER SHRINK-WRAP	PIECES PER PALETTE	EAN
5 kg	000371	-	156	8594005001862

Fertilizer for Grapevine

- Fertilizer with low chlorine content
- Thanks to the optimum nutrient ratio, it meets the requirements for **healthy and strong grapevine growth, rich fertility and high-quality grapes**
- Can be used to fertilize all other plants
- **Dosage:** before sprouting: 43–60 m² depending on the age of the vineyard, after flowering: 64–88 m² depending on the age of the vineyard

COMPOSITION: mixed fertilizer,
nitrogen – phosphorus – potassium (12-6-8) + 4% of magnesium (of magnesium)

EXPIRY DATE: 10 years from the production date

PACKAGE	PRODUCT NUMBER	PIECES PER SHRINK-WRAP	PIECES PER PALETTE	EAN
3 kg	000324	-	255	8594005001237

Fertilizer for Decorative Woody Plants

- Higher potassium and magnesium content
- Potassium – **supporting the maturing of plant tissues**
- Magnesium – **improving the woody plants' coloration**
- Used for fertilizing decorative bushes, trees, live fences – both broad-leaved and coniferous plants
- It can be used when planting and during the vegetation period too
- Package of 3 kg – with a carry-away strap
- **Dosage:** 10 kg of the fertilizer is sufficient for approx. 200 – 500 m² according to the plant's variety

COMPOSITION: Granulated fertilizer;

nitrogen – phosphorus – potassium (7–10–16.5) + magnesium

EXPIRY DATE: 10 years from the production date

PACKAGE	PRODUCT NUMBER	PIECES PER SHRINK-WRAP	PIECES PER PALETTE	EAN
3 kg	000381	–	255	8594005001770
10 kg	000877	–	80	8592542012105

Fertilizer for Hedges

- Fastest-acting nitrogen form = rapid effect
- Supports healthy and strong growth
- Magnesium prevents yellowing of leaves
- Potassium improves maturation of new shoots

COMPOSITION: N-P-K (8–10–17) + 6% MgO

EXPIRY DATE: 10 years from the production date

PACKAGE	PRODUCT NUMBER	PIECES PER SHRINK-WRAP	PIECES PER PALETTE	EAN
5 kg	000889	–	156	8592542015243

Autumn Fertilizer for Decorative Woody Plants

- Providing the plants' resistance to freezing out
- **Preventing from needles falling off and turning brown**
- Reducing the risk of fungal disease attacks
- Suitable for **all decorative woody plants** – shrubs, decorative trees, living fences fences and fruit trees (e.g. thuyas, cypress trees, hollies, hibiscuses, hydrangeas, peach trees, apricot trees, etc.)
- Simple application by scattering around the plant
- **Dosage:** 2.5 kg of the fertilizer is sufficient for up to 125 m²

COMPOSITION: Granulated fertilizer; potassium – magnesium (30-12)

EXPIRY DATE: 10 years from the production date

PACKAGE	PRODUCT NUMBER	PIECES PER SHRINK-WRAP	PIECES PER PALETTE	EAN
2,5 kg	000329	-	240	8594005006188

Fertilizer for Perennials

- Long-term fertilizer (one application with an effect of 5-6 months)
- Contains nitrogen with controlled gradual release of nutrients
- Supports healthy growth, colorful leaves and flowers
- For all for all types of perennial plants, decorative bushes and roses

COMPOSITION: Nitrogen – phosphorus – potassium (15-7-20) + 3 % of magnesium (MgO) + 80 % PCU

EXPIRY DATE: 10 years from the production date

PACKAGE	PRODUCT NUMBER	PIECES PER SHRINK-WRAP	PIECES PER PALETTE	EAN
1 kg	000867	5	300	8592542012150

Pure Cow Manure

- **Pelletised form of the fertilizer – for easier manipulation (dried pellets)**
- For basic fertilization before planting the plants requiring organic fertilization (potatoes, beet, celery, brassicaceous and fruiting vegetables)
- For fertilizing flower garden beds; when preparing the soil before planting trees and bushes
- **Dosage:** 10 kg of the fertilizer is sufficient for up to 26 m² according to the plant's variety

COMPOSITION: Organic fertilizer made of cow manure using the process of drying and pressing

EXPIRY DATE: 5 years from the production date

PACKAGE	PRODUCT NUMBER	PIECES PER SHRINK-WRAP	PIECES PER PALETTE	EAN
2,5 kg	000778	-	240	8594005009530

Pure Horse Manure

- **Granulated form of the fertilizer – for easier manipulation (dried pellets)**
- Not containing any germinating weed seeds
- Increasing the proportion of humus in the soil and increasing crop
- For basic fertilization before planting the plants requiring organic fertilization (potatoes, beet, and fruiting vegetables)
- For fertilizing flower garden beds; when preparing the soil before planting trees and bushes
- **Dosage:** 3 kg of the fertilizer is sufficient for approx. 2 - 10 m² according to the plant's variety

COMPOSITION: Organic fertilizer made of horse manure with a higher litter content; using the process of drying and pressing

EXPIRY DATE: 5 years from the production date

PACKAGE	PRODUCT NUMBER	PIECES PER SHRINK-WRAP	PIECES PER PALETTE	EAN
3 kg	000774	-	240	8594005001626

Pure Hen Manure

- Containing necessary nutrients including necessary admixture of trace elements
- **Granulated form of the fertilizer – for easier manipulation (dried pellets)**
- Not containing any germinating weed seeds
- Releasing nutrients progressively and evenly during the whole vegetation period
- The fertilizer increases the sorption capacity and biological activity of the soil ameliorates the soil structure
- It's used for basic fertilization before the planting or for additional fertilization during the vegetation (fruit, vegetables, decorative plants and other plants and crops)

COMPOSITION: Organic fertilizer made of poultry litter, adding molasses and vinasse of molasses origin

EXPIRY DATE: 5 years from the production date

OM Fertilizer for Strawberries

- **The organic components** (keratin – natural source of nitrogen and coconut fibre – aerating the soil) having a **long-term effect for nearly 60 days**; positively influencing the humus making in the soil to consequently increase its fecundity
- The mineral component – providing the green mass growing and the rich flowering
- The package is repeatedly sealable thanks to a mono-track lock zipper
- The fertilizer is suitable for all varieties of strawberries grown both in pots and in the ground
- **Dosage:** put 20 g of the fertilizer to one young plant; use a spoon, 1 full spoon = 10 g

COMPOSITION: Multi-component fertilizer with nitrogen – phosphorus – potassium (5-4-8)

EXPIRY DATE: 5 years from the production date

AGRO | ORGANIC & MINERAL FERTILIZERS

OM Fertilizer for Pelargoniums

- **The organic components** (keratin — natural source of nitrogen and coconut fibre — aerating the soil) having a **long-term effect for nearly 60 days**, positively influencing the humus making in the soil to consequently increase its fecundity
- **The mineral component** — provides the green mass growing and the rich flowering
- The package is repeatedly sealable thanks to a mono-track lock zipper
- The fertilizer is suitable for all varieties of pelargoniums grown in boxes and self-irrigating pots
- **Dosage:** put 10 g of the fertilizer to one plant; use a spoon, 1 full spoon = 10 g

COMPOSITION: Multi-component fertilizer with nitrogen — phosphorus — potassium (6-6-5)

EXPIRY DATE: 5 years from the production date

PACKAGE	PRODUCT NUMBER	PIECES PER SHRINK-WRAP	PIECES PER PALETTE	EAN
1 kg	000635	5	300	8594005006065

OM Fertilizer for Cucumbers, Courgettes and other Pumpkins

- **The organic component** — pure keratin — having a **long-term effect for nearly 60 days**, positively influences the humus making in the soil to consequently increase its fecundity
- **The mineral component** acts already within several days after being applied to provide the green mass growing and the rich flowering
- Supporting healthy growth and a typical taste of fruits
- The package is repeatedly sealable thanks to a mono-track lock zipper
- The fertilizer is suitable for cucumbers, courgettes and other pumpkins grown both in pots and in the ground
- **Dosage:** put 7,5 g of the fertilizer to one plant, use a spoon, 1 full spoon = 10 g

COMPOSITION: Multi-component fertilizer with nitrogen — phosphorus — potassium (6-2-5)

EXPIRY DATE: 5 years from the production date

VITALITY KOMPLEX

Vitality Complex is an excellent supplement to the crystalline fertilizer. It is a fertilizer accelerator that **positively influences the growth** and contributes to **the vitality of plants** (strengthens immunity against diseases and pests, regenerates weakened plants, accelerates growth, increases the flowering of flowers and fruits by up to 34%). Vitality Complex contains a natural component - **infusion from vermicompost**, which is a source of natural growth stimulants that accelerate the transport of nutrients and their uptake by the plant.

As the result, you will get beautifully flowering plants, rich crops and great fruit flavors.

VITALITY KOMPLEX

VITALITY
KOMPLEX

FLORIA

NATURA

AGRO Vitality Complex

- For all varieties of indoor, balcony and decorative plants
- **Containing a growth accelerator** – special infusion of earthworm compost
- Having regenerating effect – helps to recover when damaged by diseases and pests
- Containing an equilibrated proportion of nutrients and microelements – **substituting one fertilization**
- The prepared solution to be applied once every 2 weeks, alternate it with the application of Kristalon fertilizer
- **Dosage:** 15 ml in 1 litre of water for the watering / 15 ml in 1.5 litres of water for leaf-spraying

COMPOSITION: Liquid auxiliary preparation intended for the watering and application on leaves

- For all varieties of balcony plants like pelargoniums, surfinias, begonias, fuchsias, million bells, etc.
- **Containing a high dose of growth accelerator** – special infusion of earthworm compost
- Having regenerating effect – helps to recover when damaged by diseases and pests
- Containing an equilibrated proportion of nutrients and microelements – **substituting one fertilization**
- The prepared solution to be applied once every 2 weeks, alternate it with the application of Kristalon fertilizer
- **Dosage:** 30 ml in 5 litres of water for the watering / 15 ml in 3 litres of water for leaf-spraying

COMPOSITION: Liquid auxiliary preparation intended for the watering and application on leaves

EXPIRY DATE: 5 years from the production date

PACKAGE	PRODUCT NUMBER	PIECES PER SHRINK-WRAP	PIECES PER PALETTE	EAN

VITALITY KOMPLEX

AGRO Vitality Komplex Blueberries and Cranberries

- For all **acidophilic plants** such as blueberries, cranberries, azaleas, rhododendrons, hydrangeas, etc.
- Special liquor from vermicompost
- A probiotic for plants — energy for growth, flowering and fruiting
- Balanced ratio of nutrients and micro-elements — replaces one round of fertilisation
- Apply the mixed solution once per 14 days — alternate with Kristalon
- **Dosage:** 15 ml into 2 litres of water

COMPOSITION: liquid plant bio-stimulator intended for watering and leaf application

EXPIRY DATE: 5 years from the production date

AGRO Vitality Komplex Indoor Plants and Orchids

- For all varieties of newly grown orchids
- **Containing a growth accelerator** — special infusion of earthworm compost
- **Having regenerating effect** — helps to recover when damaged by diseases and pests
- Containing an equilibrated proportion of nutrients and microelements — **substituting one fertilization**
- The prepared solution to be applied once every 2 weeks, alternate it with the application of Kristalon fertilizer
- **Dosage:** 15 ml in 2 litres of water for the watering / 4 ml in 1 litre of water for leaf-spraying

COMPOSITION: Liquid auxiliary preparation intended for the watering and application on leaves

EXPIRY DATE: 5 years from the production date

AGRO Vitality Komplex Spray

- Suitable for all types of indoor and balcony plants, as well as ornamental and edible gardens (fruits, vegetables, herbs)
- Special extract from vermicompost
- **Plant probiotic** — energy for growth, flowering, and fruiting
- Balanced ratio of nutrients and micronutrients — replaces one regular fertilization
- **Dosage:**

For stressed or damaged plants: apply once a week for 1 month
For preventive care: apply once every 14 days

COMPOSITION: Liquid plant biostimulator for direct foliar application

EXPIRY DATE: 5 years from the production date

VITALITY KOMPLEX

probiotic for your plants

from vermicompost

VITALITY
KOMPLEX

FLORIA

NATURA

- new design, new composition
- improves nutrient uptake and plant immunity
- for higher flower and fruit set

FLORIA premium range has been on the market for more than 10 years. Since then, the brand has built a strong market position and FLORIA's products are sold in most of the hobby and garden centres in the Czech Republic and Slovakia. FLORIA offers a comprehensive range of **substrates, fertilizers, grass mixtures and decorative materials of the highest quality**. Most of the FLORIA products contain a lot of **valuable benefits** (coconut fibre, mycorrhizal fungi, AQUA Cell, GUANO, perlite, etc.), that help growers in plant care.

COCONUT FIBRE

It has a positive impact on stability of substrate's structure and extends the product's service life. FLORIA substrates contain 10 – 20% of coconut fibres.

AIR UP

The composition of substrate is developed exactly according to the plant's needs. It ensures a high level of air in the root zone, thereby contributing to luxuriant growth and abundant blooming.

HYDROGEL

Power of the powder concentrate is that it swells and creates a stable gel in water. Its particles bind at least 250 multiples of water and supply the roots with water after covering them. Thus, losses are reduced when replanting, transporting and storing plants. HYDROGEL ensures better contact between roots and soil after replanting a plant.

GUANO

Guano is an extremely valuable natural fertilizer, which comes from droppings of seabirds. Seabirds live mainly on sea fish and that is why their droppings are rich in phosphorus and magnesium.

MYCORRHIZA

Mycorrhizal fungi are capable of getting deeper to the soil, thus making use of all nutrients available. The presence of mycorrhizal fungi provides plants with many benefits, such as balanced growth, healthier root system, more abundant inflorescence and long term blooming, less need of watering and fertilization, overcoming droughts, immunity of plant when replanting and protection against some soil diseases.

MICROELEMENTS

Microelements in FLORIA fertilizers support the utilization of main and secondary nutrients that provide a good growth and development of plants. For instance, manganese, iron and copper contained in FLORIA fertilizers influence photosynthesis. Microelements are as important for plants as vitamins are for people.

PERLIT

Perlit is a lightweight, grainy, porous white material made from raw perlite by heat treatment. Perlite is used for aeration of most of the substrates. This product stabilizes wetness in soil, improves using fertilizer and contributes to a good condition of plants.

SOAKING AGENT

When applying a fertilizer, there are some drops left on the leaves that flow down. Soaking agent, contained in foliar nutrition, helps the fertilizer to create a single unbroken layer that easily adheres and ensures a maximum supply of nutrients to a plant.

ZEOLITE

Zeolite is a microporous natural material commonly used when producing combined fertilizers. In its pores, ZEOLITE can absorb not only water, but also nutrients in its pores, so there is no flooding out to the bottom layer of soil. Zeolite is also used as a regulator of soil wetness, thus lengthening the effect of mineral fertilizers.

AQUA Cell

AQUA Cell contained in substrates reduces surface tension. After watering, water unequally splits and leaks out while roots do not use it up. One of the greatest advantages of AQUA Cell constituent is the slowdown of desiccation of a substrate and thanks to that, there is less need of watering and there are ideal conditions for a healthy structure of roots.

BENTONITE

Bentonite is a clayey rock with high ability of absorbing nutrients contained in soil after watering and then gradually releasing these nutrients according to the current needs of plants.

PUMICE

Pumice is a light, porous and natural material. Pumice excellently absorbs water and nutrients in its porous structure and then gradually releases these nutrients while still keeping a substrate aired.

LIADRAIN

Liadrain is a ground, ceramic gravel, which is added to special substrates. Primarily, it improves physical properties of substrates and supports a long-term wetness control in the root zone.

FLORIA Substrate for Gardening

- **Unique and improved formula**
- With **activated carbon** for water retention
- With **perlite** and **coconut fibers** for soil aeration
- With **mycorrhizal fungi** for better nutrient uptake
- For all types of fruit, vegetables, and ornamental plants

COMPOSITION: White and black peat, coconut fiber, perlite, activated carbon, mycorrhizal fungi, bentonite, AQUA Cell®, nutrients for the first 6 weeks

EXPIRY DATE: 3 years from the production date

FLORIA Substrate for Bonsai

- **Natural Stability & Protection:** Mineral mix (pumice, zeolite, sand) prevents pests/fungi, mimics nature, and adds weight for container stability.
- **Water Management:** Porous pumice regulates moisture to prevent root rot and maintains a compact, decorative bonsai shape.
- **Nutrient Control:** Zeolite acts as a reservoir, retaining and releasing nutrients exactly when the plant needs them.
- **Durability & Reuse:** Non-compacting material; simply rinse and dry before reuse to prevent disease transfer.

COMPOSITION: Pumice, zeolite, and sand

EXPIRY DATE: 10 years from the production date

PACKAGE	PRODUCT NUMBER	PIECES PER SHRINK-WRAP	PIECES PER PALETTE	EAN
31	00862A	-	240	8592542017032

FLORIA MINERAL Substrate for Cacti

- **Sterile & Desert-Like:** Mimics natural desert conditions and creates an unfavorable environment for fungus gnats, molds, and fungi.
- **Water & Stability:** Porous pumice regulates moisture to prevent root rot, while the sand content provides essential weight for plant stability.
- **Nutrient Control:** Zeolite acts as a specialized reservoir, retaining nutrients and releasing them steadily according to the plant's needs.
- **Reusable & Durable:** The non-compacting structure is reusable; simply rinse and dry before new planting to eliminate disease transfer.

COMPOSITION: Zeolite, sand, and pumice

EXPIRY DATE: 10 years from the production date

PACKAGE	PRODUCT NUMBER	PIECES PER SHRINK-WRAP	PIECES PER PALETTE	EAN

FLORIA MINERAL Substrate for Houseplants

- **Pest & Mold Control:** Mineral substrate (pumice, zeolite, clay) creates unfavorable conditions for fungus gnats, molds, and fungi.
- **Aeration & Hydration:** Crushed expanded clay ensures high permeability, while porous pumice absorbs and gradually releases water as needed.
- **Nutrient Retention:** Zeolite acts as a reservoir, binding fertilizer within its structure to prevent leaching and releasing nutrients on demand.
- **Peat-Free Stability:** A heavy, peat-free alternative designed for growers seeking natural mineral cultivation and better plant support.

COMPOSITION: Zeolite, pumice and mineral granules from volcanic rock

EXPIRY DATE: 10 years from the production date

PACKAGE	PRODUCT NUMBER	PIECES PER SHRINK-WRAP	PIECES PER PALETTE	EAN

FLORIA MINERAL Substrate for Citrus

- **Pest & Mold Resistance:** This mineral substrate (clay, mineral mix) prevents the development of fungus gnats, molds, and fungi.
- **Aeration & Hydration:** Crushed expanded clay ensures excellent permeability and retains easily available water for optimal plant health.
- **Mediterranean Focus:** Specifically designed to meet the needs of citrus, palms, and other Mediterranean plants; recommended for use with FLORIA PREMIUM Interior liquid fertilizer.
- **Stable & Reusable:** The non-compacting structure maintains its volume and can be reused after rinsing and drying to prevent disease transfer.

COMPOSITION: Zeolite, crushed clay component, and pumice

EXPIRY DATE: 10 years from the production date

Organic farming is considerate not only of the environment and nature, but also of our health. **Agro NATURA** products are generally used by customers focusing on healthy lifestyle and nature protection. Recommended for customers that want to grow fruit and vegetables gently and **without chemistry**.

Cow Manure

- **Traditional natural fertilizer** for basic fertilisation before planting
- Use throughout the entire garden, including the greenhouse and hotbed
- For fruits and vegetables, for fertilising flower beds, or before planting of trees and shrubs
- Contributes to higher fertility of soil
- Enhances water-retention capacity of soil
- Contains no viable weed seeds
- Application by spreading and working into the soil (digging or ploughing in)
- The product is authorized for use in organic production in compliance with European regulations

EXPIRY DATE: 5 years from the production date

Farmyard Manure

- **Traditional natural organic fertilizer** – well-matured manure designed for digging into the soil
- Enriches the soil with valuable organic matter and essential nutrients
- Helps increase soil fertility naturally, without chemicals
- Improves the soil's ability to retain water
- Supports healthy microbial life and improves the soil's water balance
- Versatile use throughout the garden in spring and autumn (for basic fertilization of vegetables, fruit trees and other crops)
- Apply by digging into the soil at a rate of **16–20 l per 10 m²**
- Suitable for open ground as well as greenhouses and hotbeds
- One package treats up to **25 m²**

EXPIRY DATE: 5 years from the production date

ORGANICS for the Whole Garden

- **Traditional natural fertilizer for basic fertilization before planting**
- Use in the garden, including the greenhouse and hotbed
- For all vegetables, especially fruiting vegetables, cruciferous vegetables, potatoes, beets, onions, etc.
- Contributes to higher soil fertility
- Increases the soil's water retention capacity
- Does not contain germinated weed seeds
- Application by spreading and incorporation into the soil (by spading or ploughing), use in a shallow way when fertilizing
- The product is authorized for use in organic production in compliance with European regulations

EXPIRY DATE: 5 years from the production date

Substrate HERB GARDEN

- Soft natural substrate for **sowing, transplanting, growing herbs and green spices** in pots and in the ground
- Suitable for sowing all kinds of seeds and for plant cutting
- **For optimal aeration to accelerate the root growth**
- Starting dose of a fertilizer
- **Minimal possibility of waterlogging and subsequent decay of plants**
- Not suitable for growing acid-loving plants
- The product is authorized for use in organic production in compliance with European regulations

COMPOSITION: Peat, coconut fibre, clay and natural limestone, organic fertilizer

EXPIRY DATE: 5 years from the production date

PACKAGE	PRODUCT NUMBER	PIECES PER SHRINK-WRAP	PIECES PER PALETTE	EAN
10 l	00517A	-	210	8592542008429

Liquid Fertilizer HERB GARDEN

- High-quality natural organic fertilizer
- **Supporting the formation of a luxuriant roof system**
- Nutrients being easily accessible
- **Unique composition for a charming aroma and distinctive taste**
- For initial and additional fertilizing of all species of medicinal herbs (marjoram, sage, thyme, balm, etc.), root vegetables, spices and other aromatic plants cultivated both in pots and in the ground
- **Suitable for environmental farming**
- To be applied to the plants' root zone once every 2 weeks
- **Dosage:** 15 ml in 1 - 3 l of water, to mix
- The product is authorized for use in organic production in compliance with European regulations

COMPOSITION: Molasses and molasses vinasse of ground phosphates;

Nitrogen – phosphorus – potassium (6.4-1.7-9)

EXPIRY DATE: 5 years from the production date

Liquid Fertilizer GREEN MANURE

- High-quality organic fertilizer in pellet form made entirely from plant-based ingredients
- Enriches the soil before planting and supplies nutrients throughout the season
- Nutrients are released quickly – planting or sowing can begin as early as the next day
- Organic matter stimulates soil biological activity, improves structure and supports humus formation
- Suitable for all types of plants in vegetable and ornamental gardens
- Easy application by spreading and lightly incorporating into the soil
- Ideal for beds, greenhouses, raised beds and areas without crop rotation
- Excellent alternative to traditional green manure – does not introduce weed seeds
- **Application rate:** 200 g/m² (soil enrichment), 100 g/m² (additional fertilization)
- Approved for organic farming (EU regulations)
- **EXPIRY DATE:** 10 years from the production date

1.5 l	000760	8	240	8592542012136

GARDEN Substrate

- Fine natural substrate for UNIVERSAL use
- Optimal aeration for accelerating the root growth
- Starting dose of an organic fertilizer
- Great ability to supply plants with water
- The basis for growing organic fruit and organic vegetables in pots and in the ground
- Can be used for transplanting vegetable and flower seedlings and for planting fruit trees and shrubs
- Not suitable for growing acid-loving plants
- The product is authorized for use in organic production in compliance with European regulations

COMPOSITION: Peat, coconut fibre, clay and natural limestone, organic fertilizer

EXPIRY DATE: 3 years from the production date

GARDEN Liquid Fertilizer

- Natural fertilizer for UNIVERSAL use
- Supports the creation of a rich root system
- Easy acceptance of nutrients and trace elements
- About 50% of nitrogen received in the first two weeks, the rest within the next 2-4 weeks
- For fertilizing vegetables, fruits, herbs, grapevine, fruit shrubs, trees and ornamental plants at home and in the garden
- Application once every 7 days to the root zone of plants or by spraying on leaves without the risk of leaves damage
- Dosage: 15 ml in 1-3l of water
- The product is authorized for use in organic production in compliance with European regulations

COMPOSITION: Molasses, molasses stillage and ground phosphates, Nitrogen – phosphorus – potassium (6,4-1,7-9)

EXPIRY DATE: 5 years from the production date

Natural fertilizer for Fruiting Vegetables

- Natural Fertilizer for Fruiting Vegetables
- Increased potassium content and trace elements contribute to the growth and ripening of the fruit
- Improves the soil structure
- For fertilizing fruiting vegetables, especially tomatoes, cucumbers, courgettes, pumpkins, peppers, etc.
- For growing in the soil and pots
- Application by watering once every 14 days to the root zone of plants without the risk of leaves damage
- Dosage: 10-15 ml in 1 l of water
- The product is authorized for use in organic production in compliance with European regulations

COMPOSITION: Molasses, molasses stillage and ground phosphates, Nitrogen – phosphorus – potassium (6,4-1,7-9)

EXPIRY DATE: 5 years from the production date

Substrate for Tomatoes, Cucumbers and Peppers

- For growing organic vegetables in pots and in the ground
- **Fine natural substrate**
- **Optimal aeration for accelerating the root growth**
- **Starting dose of an organic fertilizer for 3-4 weeks**
- Great ability to supply plants with water
- For all types of tomatoes, peppers (including chilli peppers) and cucumbers
- The product is authorized for use in organic production in compliance with European regulations

COMPOSITION: Peat, coconut fibre, clay and natural limestone, organic fertilizer

EXPIRY DATE: 3 years from the production date

Natural Fertilize for Tomatoes and Peppers

- **High quality natural organic fertilizer in the form of pellets**
- Malt sprouts as a rich source of phytohormones for the support of the root system growth
- **Long-term action - nitrogen is released slowly**
- **Organic substances stimulate the biological activity of the soil**
- For all types of tomatoes and peppers (including chilli peppers)
- Application by spreading and incorporation into the soil
- The product is authorized for use in organic production in compliance with European regulations

COMPOSITION: Malt sprouts, feather meal and meat and bone meal, molasses and molasses stillage, Nitrogen – phosphorus – potassium (7.5-0.4-2.5)

EXPIRY DATE: 5 years from the production date

Natural Fertilizer for Cucumbers, Courgettes, Pumpkins and Melons

- **High quality natural organic fertilizer in the form of pellets**
- Malt sprouts as a rich source of phytohormones for the support of the root system growth
- **Long-term action - nitrogen is released slowly**
- **Organic substances stimulate the biological activity of the soil**
- For cucurbita - cucumbers, courgettes, pumpkins (including Hokkaido) and melons in the outdoor garden, hotbeds, greenhouses and raised flower beds
- Application by spreading and incorporation into the soil
- The product is authorized for use in organic production in compliance with European regulations

COMPOSITION: Malt sprouts, feather meal and meat and bone meal, molasses and molasses stillage, Nitrogen – phosphorus – potassium (7.5-0.4-2.5)

EXPIRY DATE: 5 years from the production date

Substrate for Strawberries and small fruits

- For organic fruit growing
- **Fine natural substrate**
- Optimal aeration for accelerating the root growth
- **Starting dose of an organic fertilizer for 3-4 weeks**
- **Great ability to supply plants with water**
- For all kinds of strawberries including overhanging strawberries and other small fruit such as gooseberries, currants, josts or raspberries grown in pots and in the ground
- The product is authorized for use in organic production in compliance with European regulations

COMPOSITION: Peat, coconut fibre, clay and natural limestone, organic fertilizer

EXPIRY DATE: 3 years from the production date

NATURA | FOR BLUEBERRIES

Substrate for Blueberries and Cranberries

- **Fine natural substrate for acid-loving plants**
- Optimal aeration for accelerating the root growth
- Starting dose of an organic fertilizer for 2 months
- Great ability to supply plants with water
- For all types of blueberries, cranberries, vaccinium, shadbush, etc.
- Can be used for planting ornamental acid-loving plants such as azaleas, rhododendrons, hydrangeas and heather
- The product is authorized for use in organic production in compliance with European regulations

COMPOSITION: Peat, coconut peat, organic fertilizer

EXPIRY DATE: 3 years from the production date

Natural Fertilizer for Blueberries and Cranberries

- **Natural fertilizer with reduced pH** to meet the needs of acidophilic plants
- Supports rich flowering and fertility with high nutritional value
- Improves soil structure
- For additional feeding of all species and varieties of blueberries, cranberries and other acidophilic plants (heathers, hydrangeas, rhododendrons, azaleas, etc.) in the open soil and in containers
- Application by watering directly to the roots of the plants once per 14 days
- **Dosage:** 15 ml per 1 – 2 l of water
- The product is authorized for use in organic production in compliance with European regulations

COMPOSITION: Components of strictly vegetable origin, Nitrogen – phosphorus – potassium (3-4-3)

EXPIRY DATE: 5 years from the production date

Lawn Organic Fertilizer

- **Unique natural organic fertilizer in the granulated form – long-term effect**
- Supporting the formation of dense green lawn while simultaneously suppressing the growth of weeds and mosses
- **Increasing the soil biological activity**
- **For all types of lawn** – with no risk of burning the grass vegetation
- Not being a menace to pet animals and useful organisms
- Easy application by scattering around (once a month) – manually or with the use of a fertilizer spreader on a dry mown lawn
- A package of 8 kg is sufficient for 160 – 800 m²

COMPOSITION: Poultry litter with the admixture of molasses and vinasse of the molasses origin; Nitrogen – phosphorus – potassium (5-3-8)

EXPIRY DATE: 5 years from the production date

Grass Seed Mixture FLOWERING MEADOW

- Grass seed mixture for a natural effect of a flowering meadow
- For initial and additional seeding in the vicinity of country farms and cottages
- **Suitable with all soil-type conditions**
- **Natural surroundings to insects and butterflies**
- Recommended mowing 2 times a year – herbs must be seeded
- Recommended dosage: 5 – 8 g/m²
- The package content is sufficient for up to 180 m²

COMPOSITION: Assorted mixture of approx. 40 species of grass seeds and meadow plants

EXPIRY DATE: 4 years from the production date

NATURA | RAISED BEDS

Substrate for Raised Beds

- **TOP layer of the raised bed (or as filler of a raised bed)**
- Unique structure ensuring optimal aeration of the root bale
- Starting dose of natural fertilizer for 2 – 3 weeks
- For growing of vegetables, berry fruits, herbs, flowering and non-flowering ornamental plants
- NOT suitable for acidophilic species

COMPOSITION: Peat, coconut fibre, clay, limestone modifying pH, organic fertilizer

EXPIRY DATE: 3 years from the production date

PACKAGE	PRODUCT NUMBER	PIECES PER SHRINK-WRAP	PIECES PER PALETTE	EAN
50 l	00515A	-	51	8592542002922

Compost for Raised Beds

- **MIDDLE layer of the raised bed**
- Source of essential nutrients (mainly nitrogen) and trace elements
- Nutrients are released gradually
- During decomposition it releases heat and warms the soil = impulse and energy for growth

COMPOSITION: Organic fertilizer with high content of organic substances of strictly plant origin, with addition of dolomitic limestone

EXPIRY DATE: 3 years from the production date

PACKAGE	PRODUCT NUMBER	PIECES PER SHRINK-WRAP	PIECES PER PALETTE	EAN
50 l	00514A	-	51	8592542002939

Drainage layer for Raised Beds

- **BOTTOM layer of the raised bed**
- Rough structure ensures increased permeability for air and water
- Drains excess water and brings air into the bed
- Prevents rotting

COMPOSITION: Mechanically crushed and chemically untreated natural wood

EXPIRY DATE: 5 years from the production date

PACKAGE	PRODUCT NUMBER	PIECES PER SHRINK-WRAP	PIECES PER PALETTE	EAN
70 l	00516A	-	36	8592542002915
